

## PETROMARK® 10201 DPF DIESEL PARTICLE FILTER CLEANER SPRAY

PETROMARK® 10201DPF DIESEL PARTICLE FILTER CLEANER SPRAY. Diesel engines emit much more harmful soot particles, compared to petrol and/or LPG engines. By using a particle filter, the emissions of harmful gases reduces, which is better for our environment! Driving short distances, congestion and city traffic causes that the particle filter slowly silts up, as a result the exhaust gases pass through the filter more difficult and power decreases sharply. Therefore it is important to clean the particle filter regularly. A highly effective method to prevent this problem and/or remedy is to clean the particle filter with PETROMARK® 10201 DPF DIESEL PARTICLE FILTER CLEANER SPRAY. Through the application of this effective cleaner a large part of the accumulated soot particles burn, so that the exhaust gases can pass through the filter quickly again.

### Features:

- ☐ Cleans and regenerates very quickly and effectively contaminated and/or clogged particle filter without disassembly!
- ☐ Lowers the soot build-up within the particle filter
- ☐ Lowers the combustion temperature of soot so that it will burn faster.
- ☐ Extends the life of the particle filter
- ☐ Restores engine power
- ☐ Not flammable

### Applications:

- ☐ Preventive
- ☐ In case of faults in a polluted and/or clogged particle filter
- ☐ Suitable for all diesel engines of passenger cars, vans and trucks
- ☐ The contents of the aerosol is sufficiently for one treatment.
- ☐ The packaging contains a comprehensive
- ☐ See also the detailed instructions on the package.
