

PRODUCT INFORMATION

PETROMARK® 10203 DRY LUBRICANT + PTFE

PETROMARK® 10203 DRY LUBRICANT + PTFE is a high-grade lubricant with great penetrating power. If components have to be lubricated but not with a greasy lubricant this is the correct product. It has water and moisture resistant qualities and offers long-term protection against corrosion. Temperature range from -50°C up to + 260°C. Use: Shake can well before use. For nylon bearings, curtain rails, rubber parts, tools and all kind of fastening materials.
