

PETROMARK® 10232 ALUMINIUM PASTE

PETROMARK® 10232 ALUMINIUM PASTE is a high-tech paste for fast and easy assembly of wire connections. Protects against corrosion and is resistant to high pressure and temperatures from -40°C up to 1.100°C. Guarantees simple demounting under all circumstances of all screw thread connections. Reduces wear at places with high friction. Prevents cavitation and etching. Use: all screw thread connections, flanges, fittings, etc.
