

PRODUCT INFORMATION

PETROMARK® 10235 VISCO LUBE

PETROMARK® 10235 VISCO LUBE is a high pressure resistant transparent adhesive lubricant which lubricates parts exposed to strong pressure, impacts or vibration. Extremely high holding power for both metal and other materials. Is derived from a high quality synthetic grease that preserves the treated parts in a damp environment. The material is fluid and penetrates into inaccessible places. Long lasting effectiveness in places which cannot be lubricated in short term intervals. PETROMARK® 10235 VISCO LUBE has a temperature range from -35°C up to + 225°C and is resistant to corrosion. Use: Cogs and wheels, open gearboxes, chains, hinges, steel cables, winches, sealing faces, door springs, gear racks, treated spindles, hinge points etc.
