## PETROMARK® 10238 ENGINE SHINE

PETROMARK® 10238 ENGINE SHINE is an advanced protection product for engines and engine parts based on acrylic resin. A transparent flexible layer of film is thus applied to parts which have been cleaned. Product protects up to a temperature of 200 °C. Parts which are to be treated should be cleaned thoroughly first, using PETROMARK® 10237 ENGINE CLEANER & DEGREASER. Dries quickly, prevents rust, is moisture-proof and repels dirt. Will not damage rubbers, plastics, paint work and metals and promotes operational safety. Use: Shake can before use. Spraying distance 15 cm. Drying time 25 min. Do not start engine while product is drying! Repeat treatment every 6 months.
